

HEAT READING MANUAL

Day 10 - Temperature Protocol

*"Guess wrong, waste time.
Read right, move fast."*

BOTGospel | Rebellion Protocol

Temperature Zones

Zone	Signals (Any 3+)	Your Move
HOT	Eye contact holds, asks personal questions, mirrors posture, steps closer	Escalate: location change, light touch, SPEC
WARM	Pleasant but passive, short answers, neutral body	Maintain: add value, re-test
COLD	One-word replies, body angled away, phone escape	Exit gracefully ≤10 seconds

Rule: "15-minute decision window. If you can't read the temperature by then, assume WARM and pivot."

Heat Sensor Log

#	Date/Time	Zone Read	Decision Made	Outcome
1	<input type="text"/>	H/W/C	Escalate/Maintain/Exit	<input type="text"/>
2	<input type="text"/>	H/W/C	Escalate/Maintain/Exit	<input type="text"/>
3	<input type="text"/>	H/W/C	Escalate/Maintain/Exit	<input type="text"/>
4	<input type="text"/>	H/W/C	Escalate/Maintain/Exit	<input type="text"/>
5	<input type="text"/>	H/W/C	Escalate/Maintain/Exit	<input type="text"/>

Track accuracy. Misreads are learning data.

Micro-Expression Intel

Cue	HOT Signal	COLD Signal
Eyes	Dilated, sustained contact	Narrow, darting
Mouth	Slightly parted, real smile	Pressed lips, forced smile
Body	Shoulders square, leans in	Turned away, creates distance

Master the subtleties. Details determine decisions.
